

# Merry Christmas And a Happy New Year!

**Ronnie**

**Arlene**

**Coach**

**Mike**

## From the Staff of FBHM

### *FYI*

- Winterize your boat! Please don't rely on heaters to keep your boat warm. Ice storms can knock out power for days. If you must use a heater, we require that NO electric coil space heaters (which can tip over and start a fire) be used. Ceramic or oil-filled radiators are acceptable.
- Winter's nor-easters can be as brutal as summer's tropical storms. Check your lines for chafing or wear and replace them if necessary. Using chafe guard is always a good idea on high wear areas.
- We recommend topping off your fuel tanks to prevent condensation from accumulating. Valvtect Marine gasoline contains a patented Octane Performance Improver and marine-grade fuel additives which stabilize the fuel, keeping it fresh for up to a year.
- The water is now off to all docks for the winter season. Water is available from the faucet at the Maintenance Building, and the faucet on the half-wall at slip A-31 until the end of the year (by request if the weather is questionable).
- The B-Dock Bath house has been winterized and is closed until further notice due to a failure of the heat pump system. Please use the A-Dock facilities.
- The Fuel Dock and Ship's Store will be closed on Thursday, December 25th and Thursday, January 1st.
- **Thank you to everyone for a wonderful year. You are what makes FBHM a great place to be.**
- **WE DO APPRECIATE YOUR BUSINESS!**
