

FISHING BAY HARBOR MARINA

FBHM Shed Construction

September 29th saw the long awaited beginning of the seawall repairs to FBHM's second shed, slips A-53 through A-67. The first stage of construction began on the first four slips starting at A-53. Construction will progress four slips at a time, until completed. First, the new seawall is installed and secured, then the area is back-filled and then new decking is put down. Estimated completion of the project is the end of December. As the half-wall has been removed the entire length of the shed, we ask that tenants and guests be extremely cautious when transiting this area, especially between the inner and outer walkways. We apologize for the extra dust, dirt, noise, and inconvenience.
